Hair Extensions

Certified with Easihair Pro [voted Beauty Launchpad's Best Hair Extensions]

Clip In Extensions

A type of extension that is attached to a small metal clip, which is then clipped into your hair. You can curl, straighten, and color them. They can be used to add length, volume, or a pop of color to your natural hair.

Tape In Extensions

This type of hair extension is a strip of hair, perfectly colored to match your hair, that has a strip of adhesive at the top. When the extensions are placed in the hair, they can add volume, length, and versatility to hair without any damage. When cared for properly, these extensions can last for months. Maintenance is every 6–8 weeks.

Hand Tied Extensions: Getting certified Oct 2nd, 2023!!

Pro Tips: Hair Care & Styling

- Pre-book your extension follow up and maintenance, no later than 6 weeks after your initial application.
- Do not shampoo, wet hair, or exercise to the point of perspiration for 48 hours after application, as the bond needs adequate time to cure. No exceptions.
- Leave time for extra styling until you're used to working with your extra volume and/or length.

- Apply conditioner only from mid - ends.

Do not apply on your scalp or panels.

- Only use products I've recommended for your extensions.

- Be sure you are pressing your panels together when you are blow drying. This will reaffirm the bond each time. Power dry panels and scalp are before applying tension with a brush.

- **BRUSH! BRUSH! BRUSH!** This will prevent and rid your hair of tangles while keeping your hair looking and feeling beautiful. When hair is

wet, hold panels, removing any tangles by working from ends upward.

- Sleeping on a silk pillowcase will prevent your hair from tangling.
- Chlorine is not hair-friendly. If entering the pool or ocean, apply a leave-in conditioner from mid to ends and put up into a ponytail. **NO BRAIDS!**
- Stay away from sunscreen containing Avobenzone and Octocrylene, these ingredients will turn your hair orange.

Sewn In	\$1,705	\$2,235	\$2,655	\$2,945	\$650

Recommended ReApplications

Tape every 6 weeks
Sewn In every 8 weeks

FAQ

Do you require a deposit?

Yes! I do require a non-refundable deposit of 50% before I place any custom hair extension order.

How do your extensions work?

Easihair Pro offers a tape in system that adds length in less than 1hr and volume in less than 20 min. The application consists of taking sections of your hair and comfortably “sandwiching” them between 2 thin panels of hair.

How do these compare to the other tape-in systems?

Easihair Pro has the thinnest, lightest, most durable tape-in’s on the market, making it the lightest, most natural and comfortable tape in system available. They guarantee the hair quality and product performance.

How much do they cost?

Cost will be dependent upon your desired look and consultation for your specific hair type. Our looks are available for as little as \$100. Refer to the book your look extension menu for an estimate.

Will it damage my hair?

No! Easihair Pro tape-in extensions are perfectly safe and comfortable. They utilize an even weight technology to reduce tension on your own natural hair. It will actually protect and improve the condition of your existing hair sandwiched between the panels.

How long will my extensions last?

Our tape-ins are reusable so you will have up to three uses with proper at home care. Each application lasts 6 weeks.

What if I have colored hair?

Perfect! During your consultation, I will customize your color match for a seamless application. I can even enhance your existing color, or give you the pop of commitment free, chemical free bold color you've always wanted.

How many colors do you offer?

I offer 42 rich, beautiful colors and more dual and tri-blends than any other extension brand.

What type of products should I use?

Salon professional, non-hydrating or color friendly shampoos are a must to prevent the extensions from slipping and/or fading. Conditioner must be applied ONLY midshaft / low ponytail down. I will provide you with recommended products and an at home maintenance care sheet.

What type of tape do you use?

I use a medical grade tape that is latex-free, safe, comfortable, and undetectable in your natural hair.

What type of hair do you use?

I use only the best cuticle intact Remy hair which allows you to reuse your extensions for a total of 3 wears over 18-20 weeks.

How do I take these extensions out?

A follow up appointment will be scheduled 6 weeks from the initial application for removal, re-tape, and reapplication. I have a specially formulated solvent which will ensure a damage free and comfortable removal.

What lengths do they come in?

12, 16, and 20 inch

Can I workout, swim, or sweat?

Yes but do not shampoo, wet hair, or exercise to the point of perspiration for 48 hours after application, as the bond needs adequate time to cure.

Chlorine is not hair-friendly either. If entering the pool or ocean, apply a leave-in conditioner from mid to ends and put up into a ponytail.

Products To Use

Only volumizing or color care shampoos. No products that are conditioning or hydrating which contain oils and silicones, that causes slipping.

Shampoo:

Davines Volu or Minu

Easihair Pro Extension Shampoo

Conditioner:

Davines Minu

Easihair Pro Leave-in Conditioner

Heat Protectant:

Davines Blowdry Primer (wet hair)

Easihair Pro Heat Treat & Shine

Davines Melu Hair Shield (dry hair)

Dry Shampoo:

Davines Invisible Dry Shampoo

Easihair Pro Rush & Brush

Brushes:

Easihair Pro Wet/Dry Detangling Brush

The unique bristles gently detangle all hair types making this brush safe to use even on wet hair, when hair is most vulnerable to damage.

Designed with Easihair Pro's intellex technology, the Wet/Dry brush can be used to brush from root to hair ends without the risk of damaging or pulling hair extension attachments.

Easihair Pro Premium Boar Bristle Brush

This luxurious brush gently stimulates the scalp, prevents matting and tangling, and reduces frizz, without compromising the integrity of hair extension panels. The unique bristles allow the distribution of hair's natural oils while brushing, acting as a conditioning agent while adding shine to hair.
